**Attachments:** Final PRD ONLY Neonicotinoids Briefing for OD 9.12.19\_DF.pptx

Steven, Meg,

Attached are my comments on the slides. You'll notice that they mainly reflect 2 items – making the slides less visually cluttered per feedback we received from the team, and ensuring that we have good clarity in our title slides. I have comments up through where we start the back pocket slides (there, I basically note that we need to pare down the back pocket slides).

Please let me know if you have any questions.

Thanks for your efforts on this!

Dana

**Subject:** Updated Neonic Briefing Slides

Dana,

Attached is a copy of the updated neonic briefing slides for your review.

**Slides to note:**

- Slides 7-11: added to replace the “quadrant” slide
- Slide 16: updated to be more clear regarding what is currently on the label as far as acute mitigation, and what we’re proposing. Received input from RD on this as well
- Slides 18-19: updated to reflect the flow of mitigation decision making per slides 9-11
- Slide 25: included per Rick’s request, we are skeptical however of the utility this information provides (language given by Bo)

Please let me know if there are any other changes you’d like me to make to the slide deck.

On a separate matter, Meg and I began looking through the mitigation outline to make sure everything was up to date. It includes a plethora of information and history which is helpful to us in PRD specifically, but we will work next week on refining it to only list the proposed mitigation. I will send this to you once we’ve finished early next week (I’m out of the office tomorrow) if it’s alright.
